

SUTRISHNA BERA

Senior Backend Developer

Node.js | Python (FastAPI) | React.js | Microservices | AWS | PostgreSQL • Kolkata, India • +91 7008744416 •

✉ sutrishna96@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Senior Backend Developer with **6+ years** of experience building reliable web applications and microservices using **Node.js, Express.js, and Python (FastAPI)**. Experienced in creating REST APIs, message queues with **RabbitMQ**, webhook systems, and integrating third-party tools and AI services. Comfortable working with databases like **PostgreSQL, MongoDB, and MySQL**, deploying apps with **Docker on AWS**, and guiding development teams to ship clean, stable code on time.

CORE COMPETENCIES

• Backend & REST APIs	• Microservices Design	• Message Queues (RabbitMQ)
• Webhooks & Background Jobs	• Generative AI (GenAI)	• Third-Party API Integration
• Docker Containerization	• AWS Cloud (EC2 / S3)	• Database Optimization
• PostgreSQL / MongoDB / MySQL	• Code Reviews & Mentoring	• Agile & Sprint Delivery

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL

Backend: Node.js, Express.js, FastAPI, REST APIs, Microservices, WebSockets, Socket.IO, JWT Authentication

Frontend: React.js, HTML5, CSS3, JavaScript

Databases: PostgreSQL, MySQL, MongoDB, Sequelize ORM, Mongoose ODM

Queues & Messaging: RabbitMQ, Webhooks, Event-Driven Architecture

Cloud & DevOps: AWS (EC2, S3), Docker, PM2

AI & GenAI (Currently Studying & Focusing On): RAG, LangChain, Vector Databases, OpenAI API, Claude API, Prompt Engineering

Tools & Platforms: Git, GitHub, Postman, DBeaver, VS Code

PROFESSIONAL EXPERIENCE

Senior Backend Developer | Notebrains Software Services Pvt. Ltd. *March 2022 – Present | Kolkata, India*

- Responsible for designing and developing backend services and APIs across company projects using Node.js, Express.js, and Python (FastAPI).
- Design and maintain REST APIs, background task queues with RabbitMQ, and webhook listeners for reliable data flow across services.
- Design database schemas, write efficient queries in PostgreSQL and MySQL, and optimize indexes to keep data lookup and reporting fast.
- Manage containerized deployments using Docker on AWS (EC2 & S3), ensuring high availability and smooth rollouts.
- Implement secure authentication, role-based access control using JWT, and monitor server health and error logs in production.

- Work closely with frontend developers, product managers, and QA to plan sprint goals, define API contracts, and deliver features on schedule.
- Conduct code reviews, establish clean coding standards, and mentor junior and mid-level developers.

Software Developer | [Fusion Tech Lab](#)

April 2020 – March 2022 | Kolkata, India

- Built and maintained backend services and REST APIs for web and mobile applications.
- Designed relational database tables and queries in MySQL for fast data lookup and reporting.
- Added user login, role permissions, and integrated payment gateways for checkout systems.
- Worked closely with frontend developers to design clean API contracts and debug issues quickly.

Web Developer Intern | [Deveant IT Solution](#)

January 2019 – March 2020 | Kolkata, India

- Helped build web applications, write backend logic, and manage MySQL databases.
- Created responsive user interface pages using HTML5, CSS3, JavaScript, and jQuery.
- Fixed bugs reported by the QA team and added small user-requested features.

KEY PROJECTS

ShipTech – Enterprise Logistics & Courier Platform – [shiptech.in](#)

Tech: Python (FastAPI) | PostgreSQL | RabbitMQ | Webhooks | Docker | AWS EC2/S3 | REST APIs | Microservices

A multi-tenant shipping platform to book orders, track parcels across couriers, manage user wallets, and handle delivery reports.

- Built separate backend services for the API gateway, core orders, billing ledger, and courier integrations.
- Connected APIs for 6 courier partners to automate shipping label downloads, order booking, and cancellation.
- Created a wallet and billing system that tracks balances, calculates shipping rates, and records payouts accurately.
- Used RabbitMQ queues and webhooks to process delivery updates in the background.
- Deployed services using Docker on AWS EC2 and secured all endpoints with token authentication.

Cricket Data Analysis – [cbtfcricstats.ai](#)

Tech: Python | FastAPI | React.js | PostgreSQL | OpenAI API | Claude API

An AI-powered cricket stats platform that gives match summaries, player records, and insights.

- Built backend APIs with FastAPI to fetch match data, calculate statistics, and generate insights.
- Connected OpenAI and Claude APIs to generate automated match summaries and commentary.
- Built an easy-to-use dashboard in React.js for admins and users to view real-time stats and graphs.

Global Sports Network – [eagleglobalsportsnetwork.com](#)

Tech: Node.js | Express.js | React.js | MongoDB | Socket.IO | JWT

A sports networking platform connecting players, coaches, and clubs.

- Built REST APIs for user profiles, team registration, and posts.
- Added live chat and real-time alerts using Socket.IO.
- Designed MongoDB collections with indexes for quick feed loading.

Rally-Up – Event Management

Tech: Node.js | Express.js | React.js | MySQL | JWT

An event platform for ticket booking, seat selection, and schedules with a React.js frontend.

- Created APIs for browsing events, reserving seats, and confirming ticket payments.
- Built interactive web screens in React.js to let users pick seats and view booking history.

TCFS (CRM Platform)

Tech: Node.js | Express.js | PostgreSQL | JWT

A customer relationship tool for managing sales leads and support tickets.

- Built APIs to track sales leads through different stages and assign them to team members.
- Added a support ticket system with user roles and activity history.

Zoom SDK Consultation Platform

Tech: [Node.js](#) | [React.js](#) | [Zoom Video SDK](#)

A video consultation tool for booking appointments and joining live calls.

- Connected Zoom Video SDK for one-on-one and group video meetings.
- Set up automatic meeting links and email reminders for upcoming sessions.

IPAY – Loan Collection & Distributor Management

Tech: [Node.js](#) | [Express.js](#) | [MySQL](#)

A platform for tracking agent collections and distributor payouts.

- Built APIs to track daily payment collections and agent hierarchies.
- Automated payout calculations and generated clean transaction history reports.

SpinQuest – Gamified Fitness App

Tech: [Node.js](#) | [Express.js](#) | [MySQL](#)

A fitness app where users earn points and level up based on cycling distance.

- Built the logic to convert ride distance into reward points and badges.
- Created live leaderboards and an in-app reward store for avatars.

E-Commerce Platform

Tech: [Node.js](#) | [Express.js](#) | [MySQL](#) | [JWT](#)

An online store backend for product catalogs, cart checkout, and orders.

- Built product search, cart management, and payment gateway checkout.
- Added admin screens to update inventory and track shipment status.

POC – Restaurant Management System

Tech: [Node.js](#) | [Express.js](#) | [MySQL](#) | [JWT](#)

A restaurant system for table bookings, food orders, and kitchen queues.

- Built live table status checking and food ordering APIs.
- Added kitchen order queues and automatic bill printing logic.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

2014 – 2018

Mallabhum Institute of Technology (MAKAUT) • [72%](#)

Higher Secondary Education (Class XII) – Science

2014

Balichak Bhajahari Institution

Secondary Education (Class X)

2012

Balichak Girls High School
